

FOSHAN TUPO MACHINERY MANUFACTURE CO.,LTD.

*A Professional Rendering Machine Manufacturer
The Original Inventor of Rendering Machine*

Tel:+86-757-86700812 / 86700821 Fax:+86-757-86790492 Http://www.tupomachinery.com

Specification and Price of Automatic Rendering Machine (FOB Guangzhou)

No	Picture	Type	Parameter	Feature	Unit Price
1		Tupo -2	Rendering Thickness:5-30mm Rendering Speed:Apr.45m ² /hour Rendering Height: Standard up to 3.5m, Special up to 5m Dimension:1350*800*500mm Weight:180kg Electricity Phase: Three Phase Voltage:380v Power:1.5kw	Feeding mortar by manual control	E-Mail: sales1@tupo-machinery.com
2		Tupo -4	Rendering Thickness:5-30mm Rendering Speed: Apr.45m ² /hour Rendering Height: Standard up to 3.5m, Special up to 4m Dimension:800*650*550mm Weight:130kg Electricity Phase: Three Phase / Single Phase Voltage:380v/220v Power:0.75kw	Shift machine conveniently when pass door or concrete beams of ceiling, no need to disassemble directional pipes.	E-Mail: sales1@tupo-machinery.com
3		Tupo -5-1000	Rendering Thickness:5-30mm Rendering Speed: Apr.50m ² /hour Rendering Height: Standard up to 3.5m, Special up to 4m Dimension: 1000*650*550mm Weight:140kg Electricity Phase: Three Phase / Single Phase Voltage: 380v/220v Power:0.75kw	New Alluminium Alloy main unit and stainless steel directional pipes. Original gear rack driving system enable output of main power is more peaceful and stable. Less failure rate.	E-Mail: sales1@tupo-machinery.com
4		Tupo -5-1200	Rendering Thickness :5-30mm Rendering Speed: Apr.55m ² /hour Rendering Height: Standard up to 3.5m, Special up to 4m Dimension:1200*650*550mm Weight:150kg Electricity Phase: Three Phase / Single Phase Voltage: 380v/220v Power:0.75kw	Higher productivity, Bigger working area. New Alluminium Alloy main unit and stainless steel directional pipes. Original gear rack driving system enable output of main power is more peaceful and stable.Less failure rate.	E-Mail: sales1@tupo-machinery.com

FOSHAN TUPO MACHINERY MANUFACTURE CO.,LTD.

*A Professional Rendering Machine Manufacturer
The Original Inventor of Rendering Machine*

About Us

FOSHAN TUPO MACHINERY MANUFACTURER CO.,LTD locates in FOSHAN city of Guangdong Province China, where it is about 50 minutes from Guangzhou Airport and about 30 minutes from Canton Fair complex by car. The company focuses on the new innovative machinery in construction industry and keens on the research & development and manufacture of rendering machine for more than 9 years. We are the original inventor of Automatic Rendering Machine with 5 invention patents for now and are still applying for more patents for our new generation machine. We have a strong R&D teams to make us hold the lead in wall plastering industry, though we are always being imitated.

We persist in the enterprises spirit of Breakthrough, Innovation, Responsibility and Win-Win. Welcome the partners from all over the world, mutually create the future and the magnificence!

To learn more about our company and products, welcome to contact us.

TUPO Machine

- The new creation of wall plastering industry.
- The original inventor of automatic rendering machine in the world!
- The patented and qualified rendering machinery through out all over the world!
- The earliest manufacturer and seller of rendering machine in the world!
- Selling to more than 30 countries all over the world!

FOSHAN TUPO MACHINERY MANUFACTURE CO.,LTD.

*A Professional Rendering Machine Manufacturer
The Original Inventor of Rendering Machine*

➤➤ R&D STEPS:

FQ800-2A

- 2010 went into production
- First machine rendering topmost
- First machine with hydraulic pressure
- First machine can press polishing while going down

FQ800-2B

- 2010 went into production
- First machine use vibrator pressing
- Increasing rendering thickness from 1cm to 3cm

TUPO-1

- 2011 went into production
- Change the Directional Pipe from cylinder to square column. Resolved the problem of small rendering arch.

TUPO-2

- 2011 went into production
- Be capable of making internal corner and pressing cement joint.

TUPO-3

- 2012 went into production
- Broadened the rendering width to 1.35m, trying to maximize the working efficiency. but fail due to machine inclination while ascending.

TUPO-4

- 2012 went into production
- Capable of rendering small room.
- Easy to move, no need to disassemble directional pipes.
- Adopt converter technique to make motor and electrical device more durable.

TUPO-5

- 2013 went into production
- Original gear rack driving system. The machine up & down more stable
- New Alluminium Alloy main unit and stainless steel directional pipes.
- Adopt converter technique making motor and electrical device more durable.
- Overload protection by PLC technique with intelligent judgement
